OPTIMISTIC MUTATIONS

WebSocket

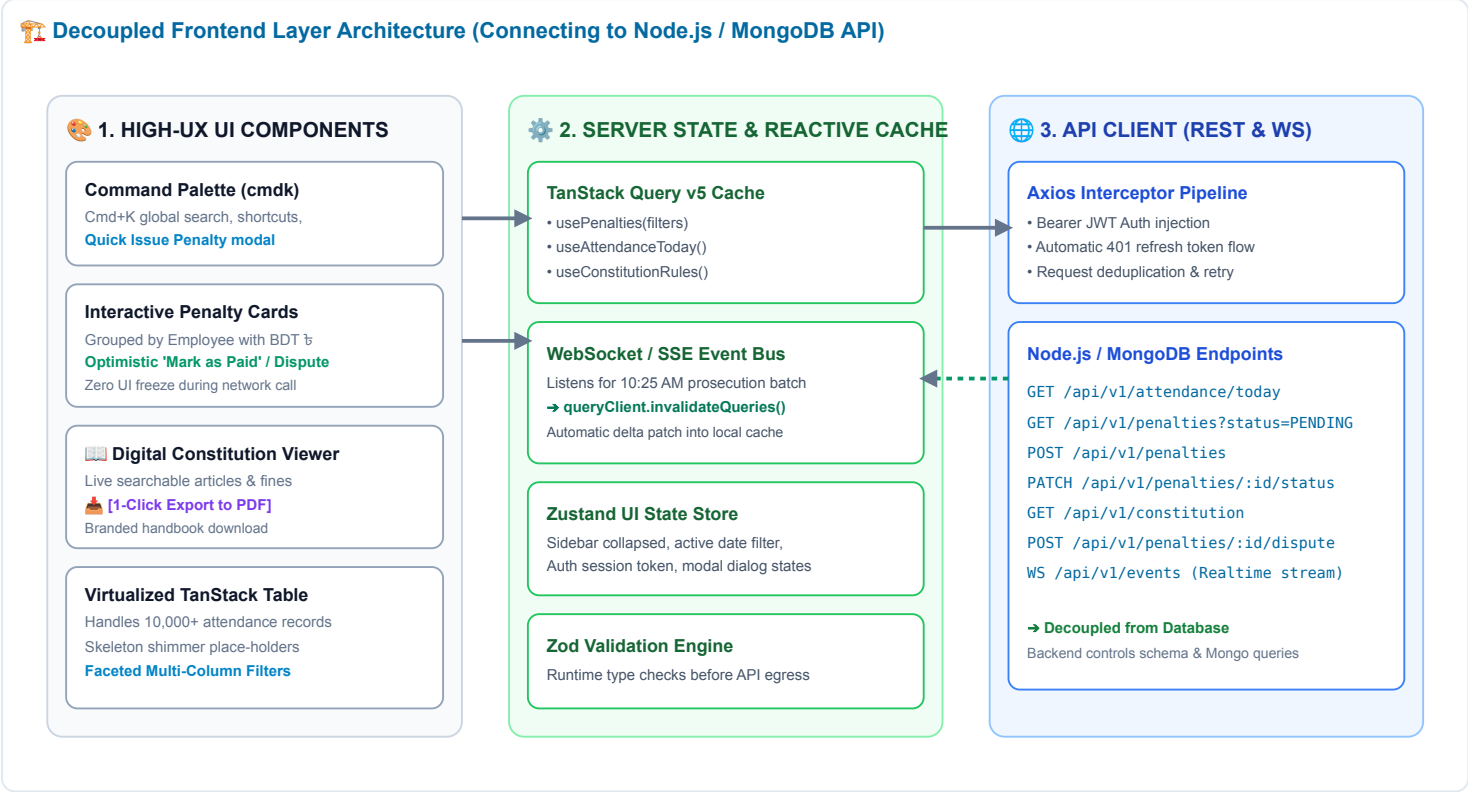

REAL-TIME INVALIDATION

TanStack Query

SERVER STATE CACHE V5

Cmd + K

GLOBAL ACTION PALETTE

 **High Performance**
No client-heavy joins. Server sends pre-aggregated pagination payloads; frontend caches with stale-while-revalidate.

 **Instant UI Feedback**
Optimistic UI updates mutate the local screen instantly (0ms) and rollback with a toast alert if the API errors.

 **Plug-and-Play API**
Strict TypeScript contracts. Backend can be written in Node.js (Express/NestJS) with MongoDB without altering UI components.

⚡ Optimistic Mutation Lifecycle (e.g. 'Mark as Paid' or 'Dispute')

☰ Cmd + K Command Menu

Instant spotlight launcher (built with cmdk). Jump to any employee, search Constitution articles, or issue an infraction with keyboard shortcuts.

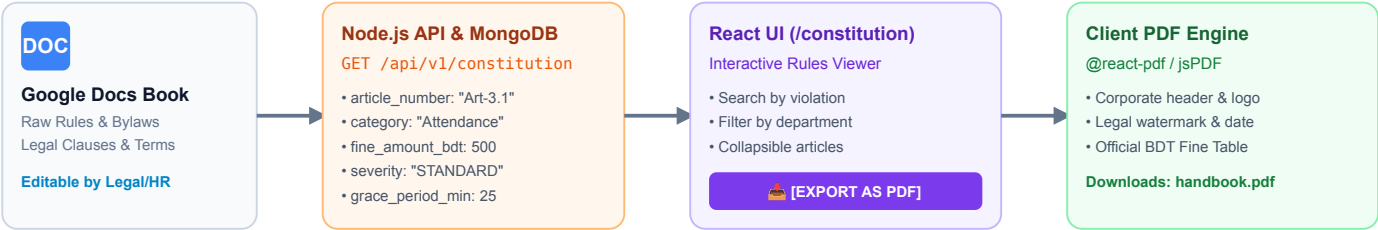

🍞 Sonner Toast System

Clean stackable toast notifications with an interactive **[Undo]** action button for accidental status toggles and dispute submissions.

💀 Skeleton Shimmer Screens

Replaces disruptive full-screen spinners with subtle content-matched pulsing skeletons, eliminating Cumulative Layout Shift (CLS).

 Constitution Authoring, Ingestion & PDF Generation Pipeline

 Enforceable Constitution Rules & Penalty Matrix (Integrated in Cloud App)

Article	Infraction Category	Violation Trigger Condition	Fine (BDT ₳)	Automated?
Art. 1.1	Attendance Check-in	Present in office but no 'done' in WhatsApp before 10:25 AM	₳ 500	YES (AUTO)
Art. 1.2	Late Arrival	Arrival at biometric terminal after 10:30 AM without prior leave	₳ 300	YES (AUTO)
Art. 2.1	Security & Compliance	Leaving workstation unlocked or security badge missing	₳ 1,000	MANUAL (HR)
Art. 3.2	Meeting Standup	Unannounced absence from mandatory daily engineering sync	₳ 400	MANUAL (LEAD)

WhatsApp Bot Real-Time Notification & 1-Click Dispute Flow

End-of-Month HRM Payroll Settlement Pipeline

1. Cutoff (25th)
Queries all accepted and undisputed penalties for current billing cycle.

2. Aggregation
Sums total fines per Employee ID and generates batch payroll deduction payload.

3. HRM Dispatch
Pushes API call to HRM Salary Engine as 'Compliance Penalty' deduction item.

4. Reconciliation
Updates MongoDB records from PENDING to PAID (via Payroll). Archives in audit ledger.
